Creation of a Matrix AI wallet

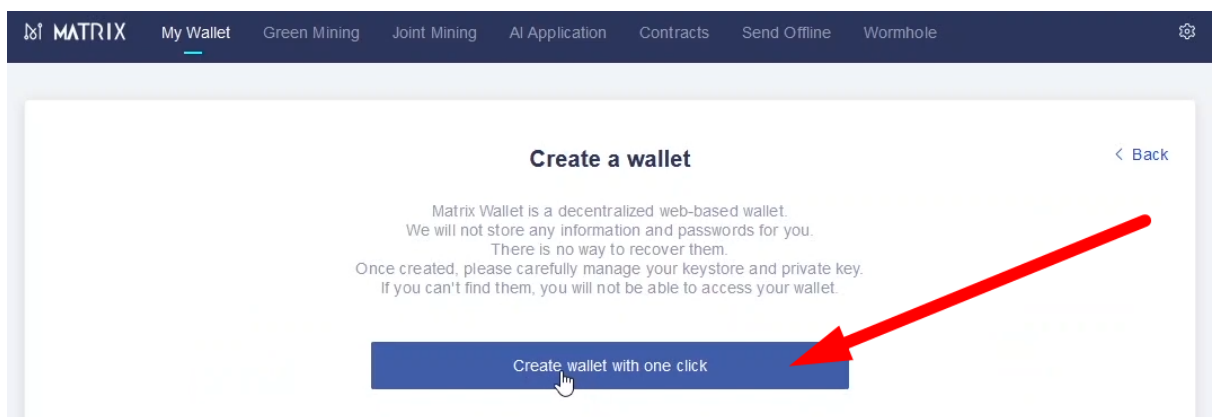

1. Go to the official website matrix.io
2. In the menu, click on Tools → Wallet:

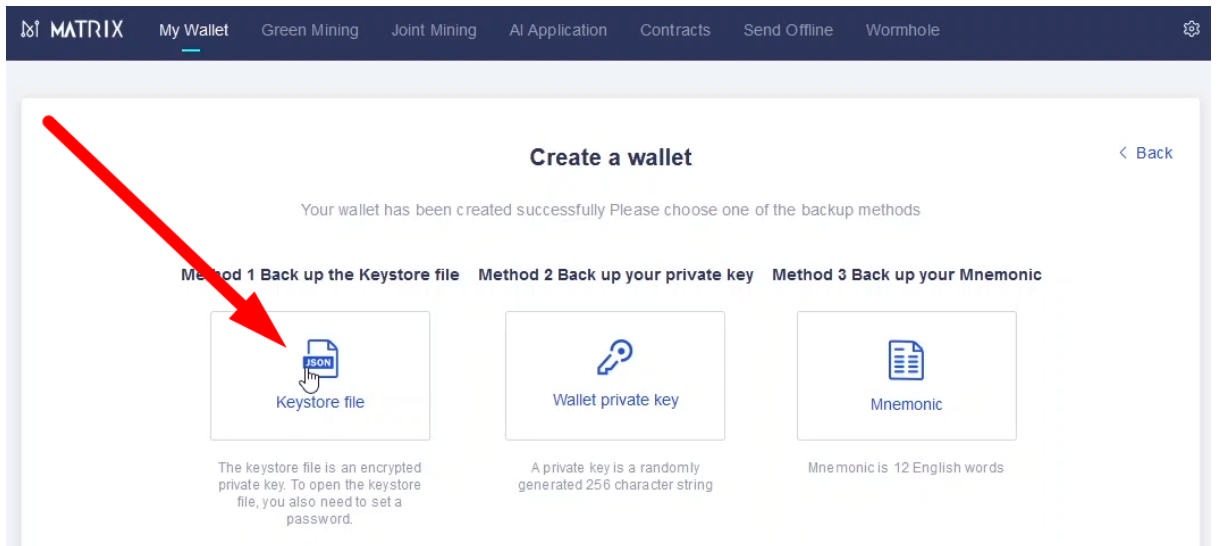

3. You arrive on a new page, click on “Create a Wallet” at the bottom:

4. Confirm by clicking on “Create a Wallet with one click”:

5. 3 methods are possible to create a wallet, the most common is with the Keystore File which combines a file to save and a password.
Click on “Keystore File” to choose this wallet creation method:

6. You will now create your password.

It is strongly recommended to use a complex password with at least one lowercase and one uppercase character, one symbol, and one number.

You can also write down the address of your \$ MAN wallet now, this info will always be available afterwards so you can do it later without problem too:

Create a wallet

Your wallet has been created successfully Please choose one of the backup methods

Method 1 Back up the Keystore file

The keystore file is an encrypted private key. To open the keystore file, you also need to set a password.

MAN address

MAN.28ugQQfZ83e96DpF9njydEpovpP96

Mot-de-Passe!Complexe;98| 

Save to drive

Then click on "Save to drive".

This step may take a little while (ten seconds or more) because the generation of the Keystore file is in progress.

7. Click on "Download Keystore File" to save the Keystore file on your computer:

Create a wallet

Your wallet has been created successfully Please choose one of the backup methods

Method 1 Back up the Keystore file

The keystore file is an encrypted private key. To open the keystore file, you also need to set a password.

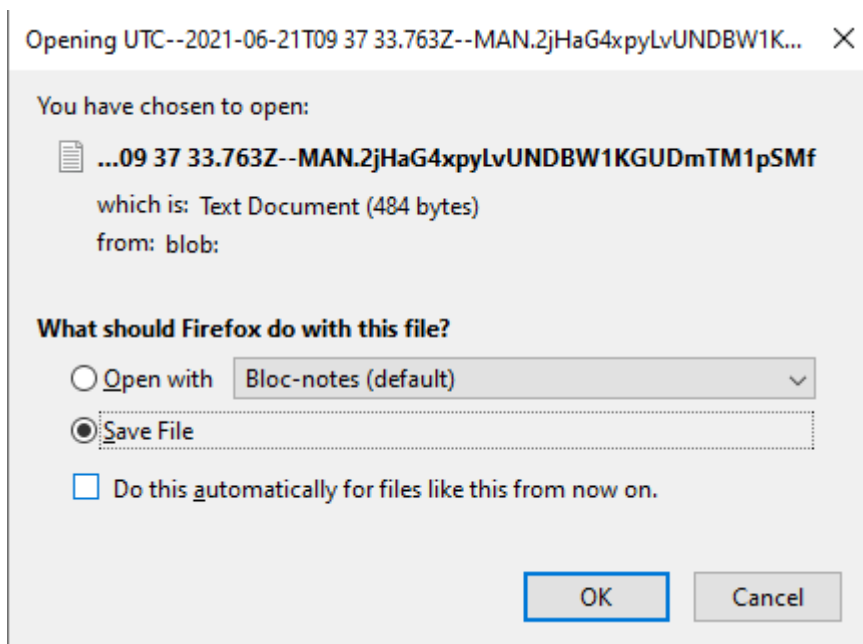

[Download Keystore file](#) 

A white rectangular button with a thin blue border. The text "Download Keystore file" is in blue, and a hand cursor icon is to its right. A large red arrow points from the top left towards this button.

[Next](#)

A solid grey rectangular button with the text "Next" in white.

8. Confirm the saving of the Keystore file on your computer:

By default, it will be saved in your "Downloads" folder

9. Click on “Next” to go to the next step:

Create a wallet

Your wallet has been created successfully Please choose one of the backup methods

Method 1 Back up the Keystore file

The keystore file is an encrypted private key. To open the keystore file, you also need to set a password.

10. Give the title of your choice to your wallet, then click on “Save”:

Set a greeting or title

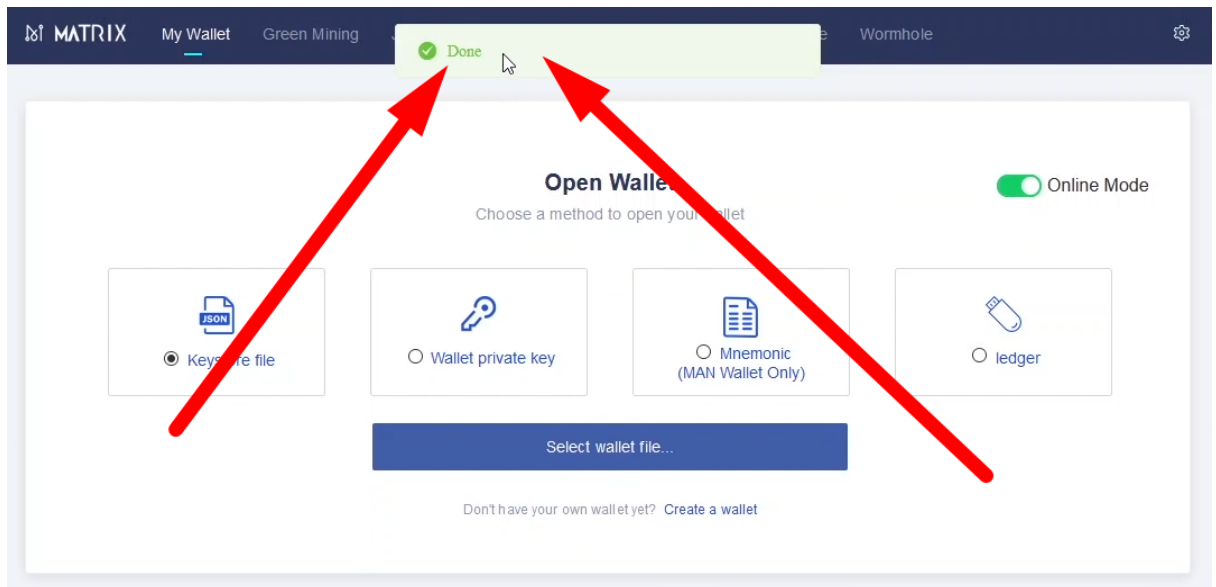

Helps you identify your wallets from one another (Example: Steve Deng's MAN Mining Wallet)

Portefeuille MAN Principal

Skip

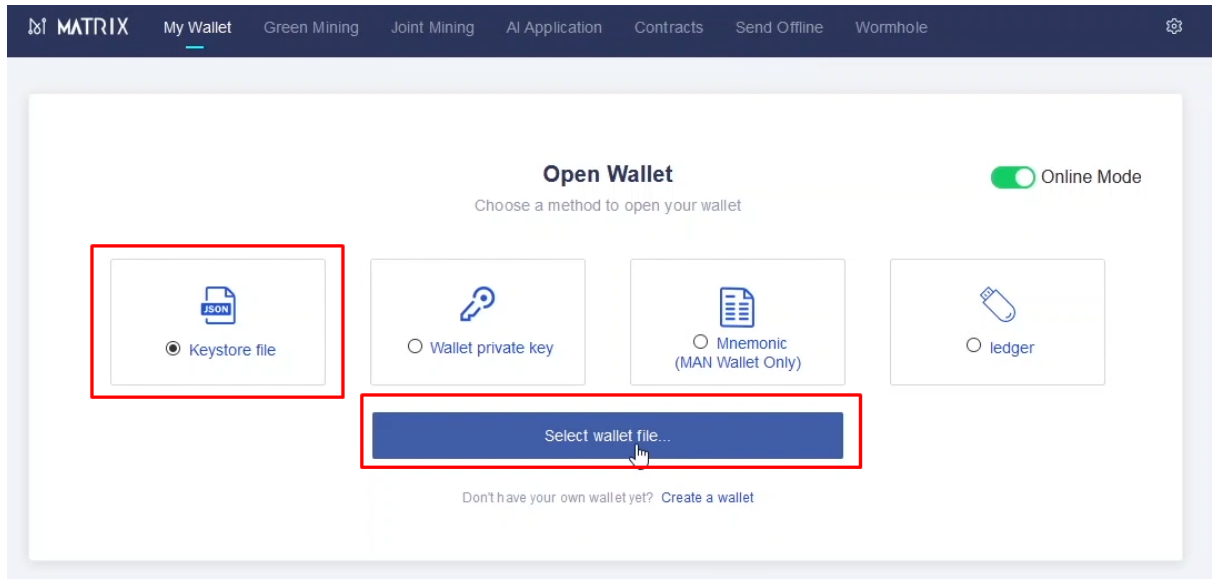

Save

11. You should return to the starting page with a small green confirmation message at the top which confirms that the wallet has been created:

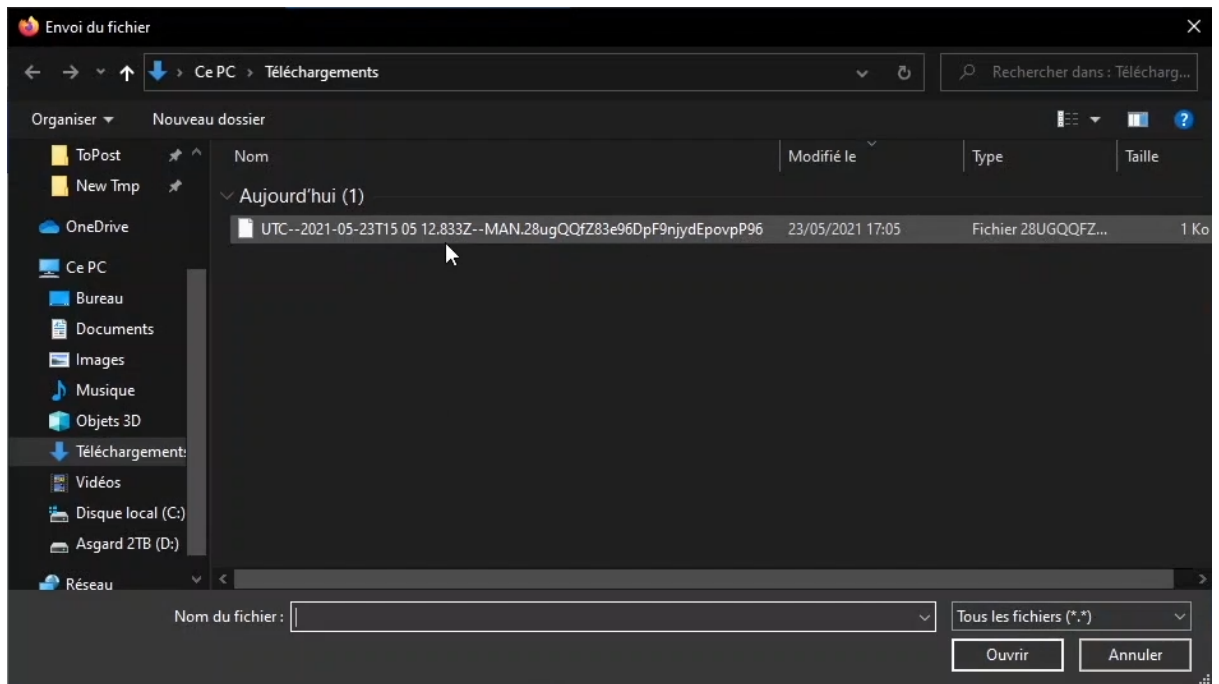

12. Your wallet is now created.

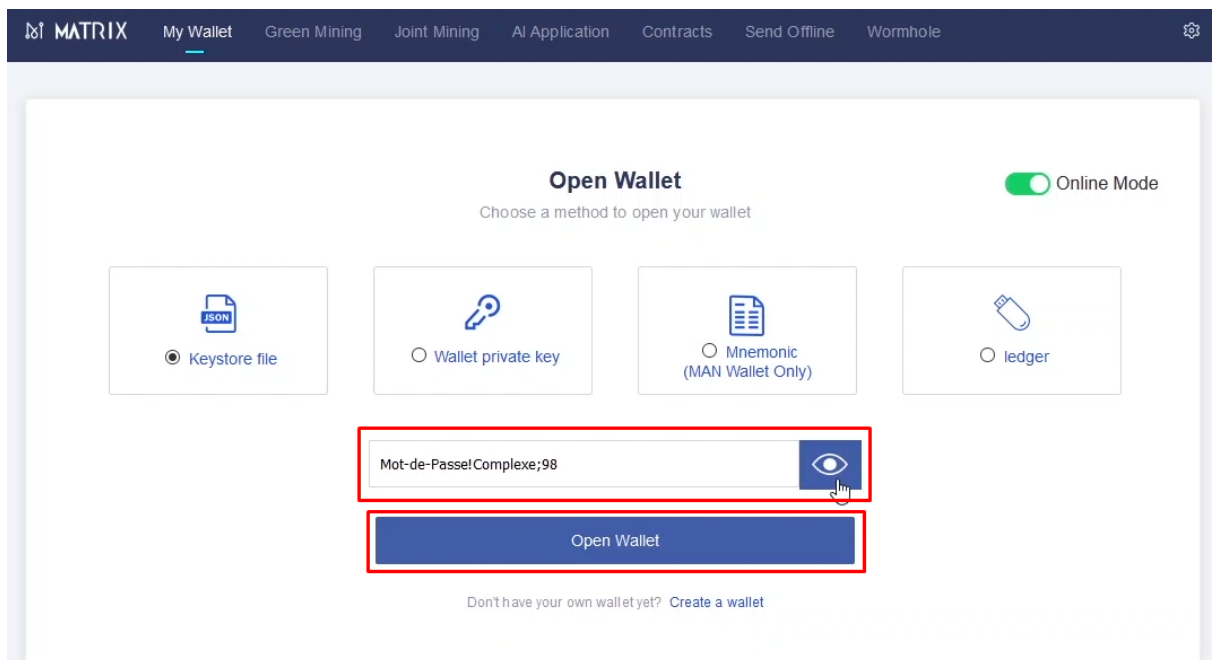

At any time, you can return to the Wallet section of the website matrix.io (see step 1) to OPEN your wallet by clicking on “Select wallet file”, with the “Keystore file” mode selected:

13. Select your Keystore file that you have previously saved on your computer:

14. Then type in the password you created, and click on “Open Wallet”:

15. If you didn't do any mistake, you should see the information below:

The screenshot displays the MATRIX wallet interface. At the top, a dark blue navigation bar contains the MATRIX logo and menu items: My Wallet, Green Mining, Joint Mining, AI Application, Contracts, and Send. Below this, a white header area shows 'My Assets | NFT Manage | Transaction Record'. The main content area is titled 'MAN Assets' and includes links for 'Transfer' and 'Undo'. A red box highlights the text 'Available Assets : 1088.666688522 (MAN)'. To the right, it shows 'Revocable Assets : 0 (MAN)' and 'Financing Assets : 0 (MAN)'. Below this, a section for 'MANWallet Address (This address is yourMAN's payment address)' contains a red box around the address 'MAN.9nXo7ezEfVAeqrQ6UzkRmLdBytFF'. Two red arrows point from external text labels to these boxes: 'Your MAN balance' points to the available assets, and 'Your MAN Wallet address' points to the wallet address.

This is how you can open and access your wallet again anytime.
